

We transferred the effects of osmosis caused by salt onto the wood. The surface is glazed monochrome or multi-colour. Salt is spread on the wet surface in different techniques. Soon the natural process is starting. Salt has the talent to absorb liquids from its surroundings and as well to collect the pigments of the paint.

The results are affected by the kind of salt used, humidity and length of reaction time. A series of experiments shows that big crystals tend to create big rims with strong contrasts, whereas fine crumbs of salt trigger more differentiated patterns with softer gradients. When combined with spruce wood, the salt draws the pigment into the natural flow of the grain, emphasizing the unique features of the original material.

With the new OSIS BLOCK EDITION, which is inspired by the shape of various rectangular bodies and is used as coffee tables or desks, the design duo LLOT LLOV presents the new colours of the OSIS surface. Inspired by the first furniture edition of OSIS - these three tables are a further development, which presents the OSIS surface very well with particularly large surfaces, as one can dive into the depths of the pattern when looking at them.

This new family of tables with round tops in OSIS with a veneer edge and matching frame colour, comes in three different sizes, high, midi and low, so there is a suitable table height for every living arrangement. Open compartments under the tabletop offer additional storage space. The steel frame is powder-coated and corresponds with the special OSIS colour patterns in Panther, Pea and Bordeaux.
