

The new edition of ADA planters and MEDEIA vases are ready to order in brushed aluminum. The unpainted surface means that the raw material is visible in its purest form. Each object is hand-turned and hand-brushed and is reminiscent of an industrial piece. Different shaped spinning chucks are used to shape the sheet metal blank in rotation for the metal spinning process.

The metal surface dully reflects the colours and light of the room, easily blending in with its surroundings.

As the surface is not lacquered, the material ages in a beautifully natural way, but is resistant to corrosion.

The MEDEIA trio is not only divers through its geometric cuts. Each vase has its purpose of a bouquet of flowers. Since MEDEIA BOLD restrains the wild branches, MEDEIA SLIM loves to hold just one flower. MEDEIA MIDI is self-confident even without any flower bouquet and charming just through its clear geometric shape. Not every vase needs to carry flowers.

Like MEDEIA it was made in a metal spinning process out of aluminum, but this one is meant to be the new home for plants with roots. They come in four types, all can be filled from both sides, allowing for endless combinations from cactus as well as palm trees. The slightly reflective metal surface creates a beautiful contrast to the fresh green leaves. The new planter edition is suitable for both indoor and outdoor use. For outdoor use, the rubber plug should be removed to prevent rainwater from accumulating.
