# ADDA PLANTER

ADA planter was made in a metal spinning process out of aluminum. They come in five types, all can be filled from both sides, allowing for endless combinations from cactus as well as palm trees.

ADA is suitable for indoor, but also for outdoor use. For exterior use, the rubber plug should be removed to prevent rainwater from accumulating.

The planter edition is available in black and brushed aluminum. ADA planters like the sun as well as shade, they most enjoy living in larger groups.

Each object is hand-turned and hand-brushed and is reminiscent of an industrial piece. Different shaped spinning chucks are used to shape the sheet metal blank in rotation for the metal spinning process.

Besides the classic black powder-coated edition, ADA planters are ready to order in brushed aluminum version. The unpainted surface means that the raw material is visible in its purest form.

The slightly reflective metal surface creates a beautiful contrast to the fresh green leaves. As the surface is not lacquered, the material ages in a beautifully natural way, but is resistant to corrosion.

Addressing the need of our customers looking for better domestication of the largest potted plants, we added ADA BIG to our planter collection.

With 58 centimeters in height and 40 centimeters in diameter, the biggest of planters is the one to make an impression.

Made to house large plants, ADA BiG will be an elegant addition to your lounge area or garden.

planter:	big
measurements:	580 x 400mm
weight:	3,5kg

planter:	bold
measurements:	500mm x 350mm
weight:	1,5kg

planter:	large
measurements:	520mm x 320mm
weight:	1,7 kg

planter:	midi
measurements:	370mm x 230mm
weight:	1kg

planter:	small
measurements:	340mm x 210mm
weight:	1kg

# MEDIAN VASE

The MEDEIA trio is not only diverse through its geometric cuts. Each vase has its purpose of bouquet of flowers.

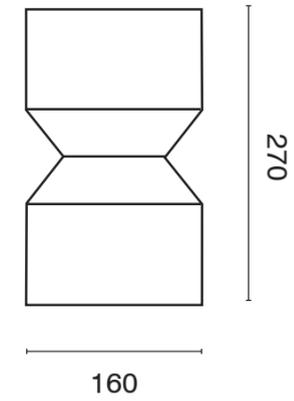

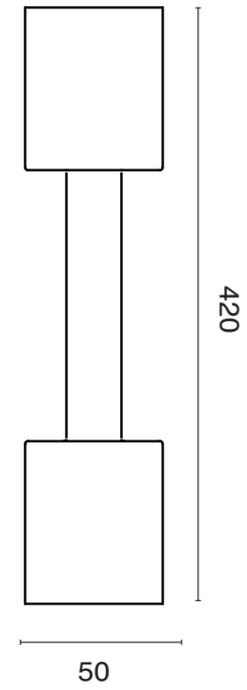

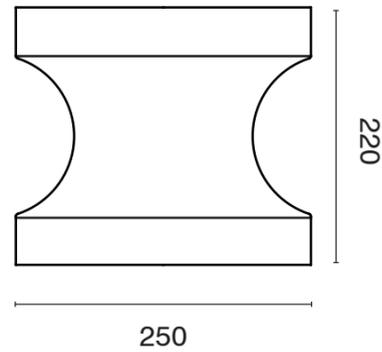

Since MEDEIA BOLD restrains the wild branches, MEDEIA SLIM loves to hold just one flower. MEDEIA MIDI is self-confident even without any flower bouquet and charming just through its clear geometric shape. Not every vase needs to carry flowers.

With their geometric and austere shapes, the three vases are a sculptural counterpart to the bouquet of flowers they hold.

The Trio is made from aluminum and dresses in powder-coated black, white, blue or in brushed raw finish.
