FRAN

All FRAN lamps are handmade in Latvia. Our production partner Dobbins and Daughters works with mothers and housewives who are not able to work regularly and therefore take on the production at home and in their own time.

For each lamp, the rayon raffia fringes are sewn together and then applied by hand to lamp rings. The individual rings are then connected with chain links. Finally, quality control is carried out by Dobbins and Daughters. The finishing of the luminaires is carried out in Germany by a licensed company.

The fringes of the lamps from the FRAN family are made of rayon raffia, a sustainable and hard-wearing material also known as Japanese grass. The cellulose fiber is obtained from plants and is therefore biodegradable and recyclable.

The FRAN EDITION is an extension of the pendant lamp collection, available in three additional sizes and shapes. The EDITION is even more demanding in its production than other lights of the FRAN family, as more fringes are sewn by hand on different shapes. The different and voluminous objects are reminiscent of matryoshka, Asian lanterns or traditional African masks.

The new edition of the FRAN lamp does not fly, but has a solid base for a stable stand. The straight-lined bases are available in beige and metallic and thus fit into different living situations. With their object character, they underline both flamboyant and architecturally austere environments. The lampshades of the table and floor lamp are made of the natural material raffia. The natural fibers cast the cozy light typical of FRAN.

The table lamp FRAN is available in the sizes midi and large. In 70 or 90 centimeter in height, it is present on the night table as well as a sculptural object on a sideboard.

With a solid block base, FRAN FLOOR is a massive floor lamp with a height of 180 centimeters. Its lampshade unfolds an eccentric effect with its 80 centimeter diameter.

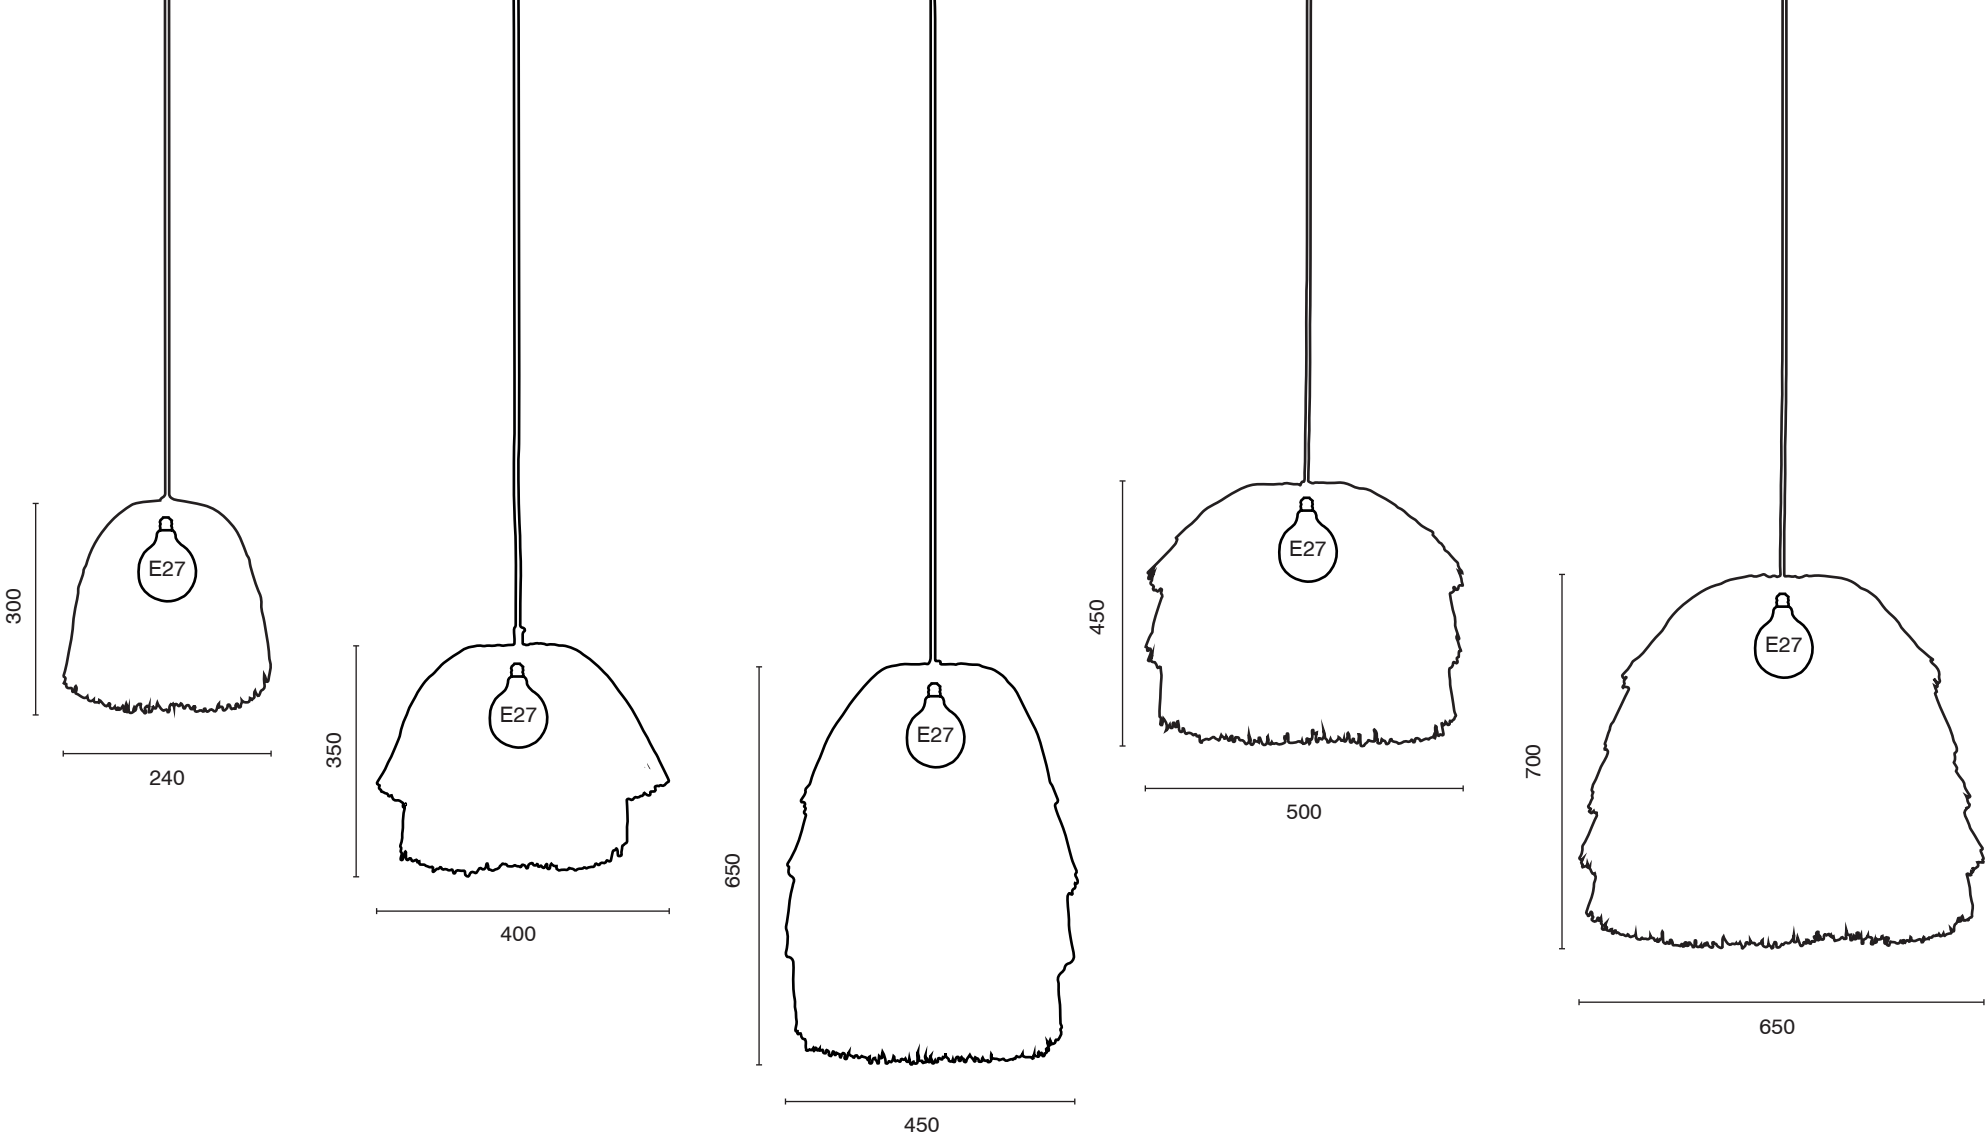

The latest addition to the FRAN family is the FRAN TOWER. The eye-catching and elaborately handcrafted light object consists of 15 rings sewn with fringes of rayon raffia, which are lined up in different widths. The FRAN TOWER, whose shape is reminiscent of a lampshade totem, is 1.9 meters high and 65 cm in diameter. In the middle of the shade, there is a dimmable customized LED fabrication to illuminate the object evenly.

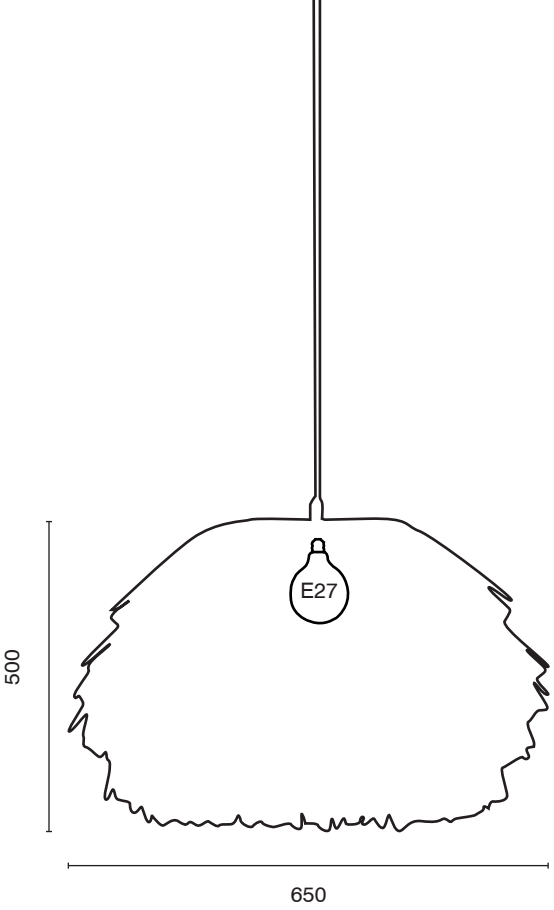

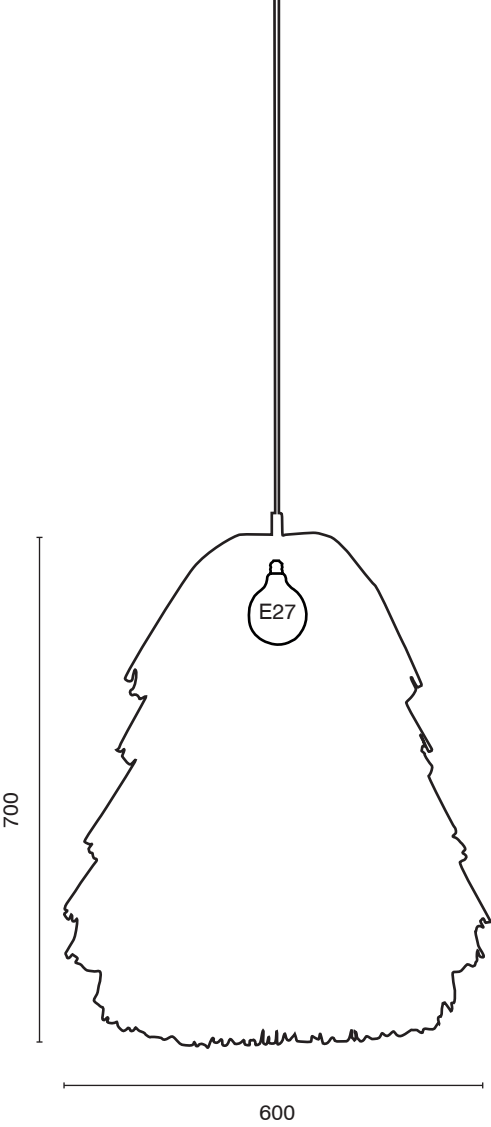

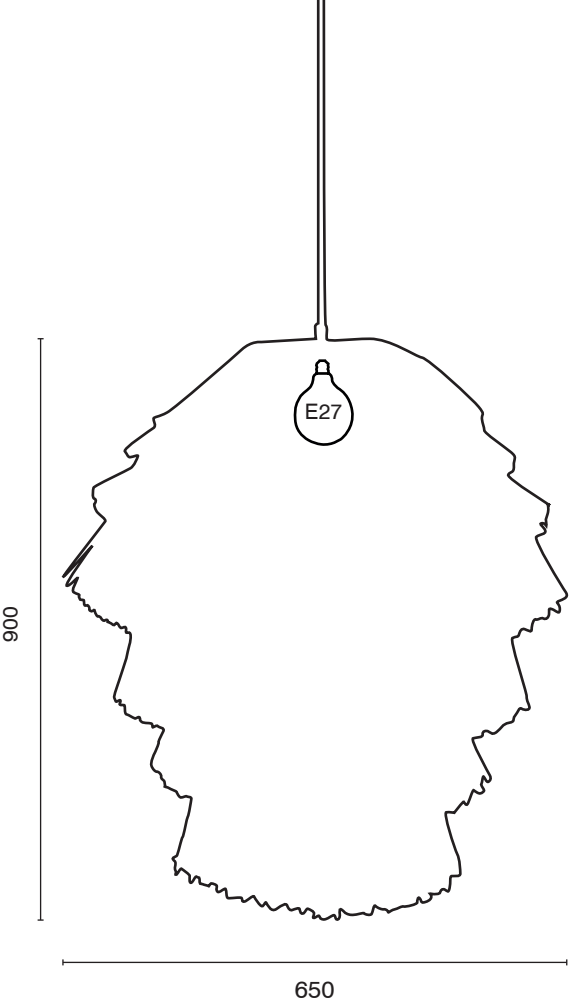

For the salon of ROSA KARL, LLOT LLOV has developed two new FRAN lamps, which are now also part of the Raffia collection. FRAN DRUM & FRAN HIVE hang above the vintage Italian sofa, providing a cosy zone in addition to acoustic inhibition.

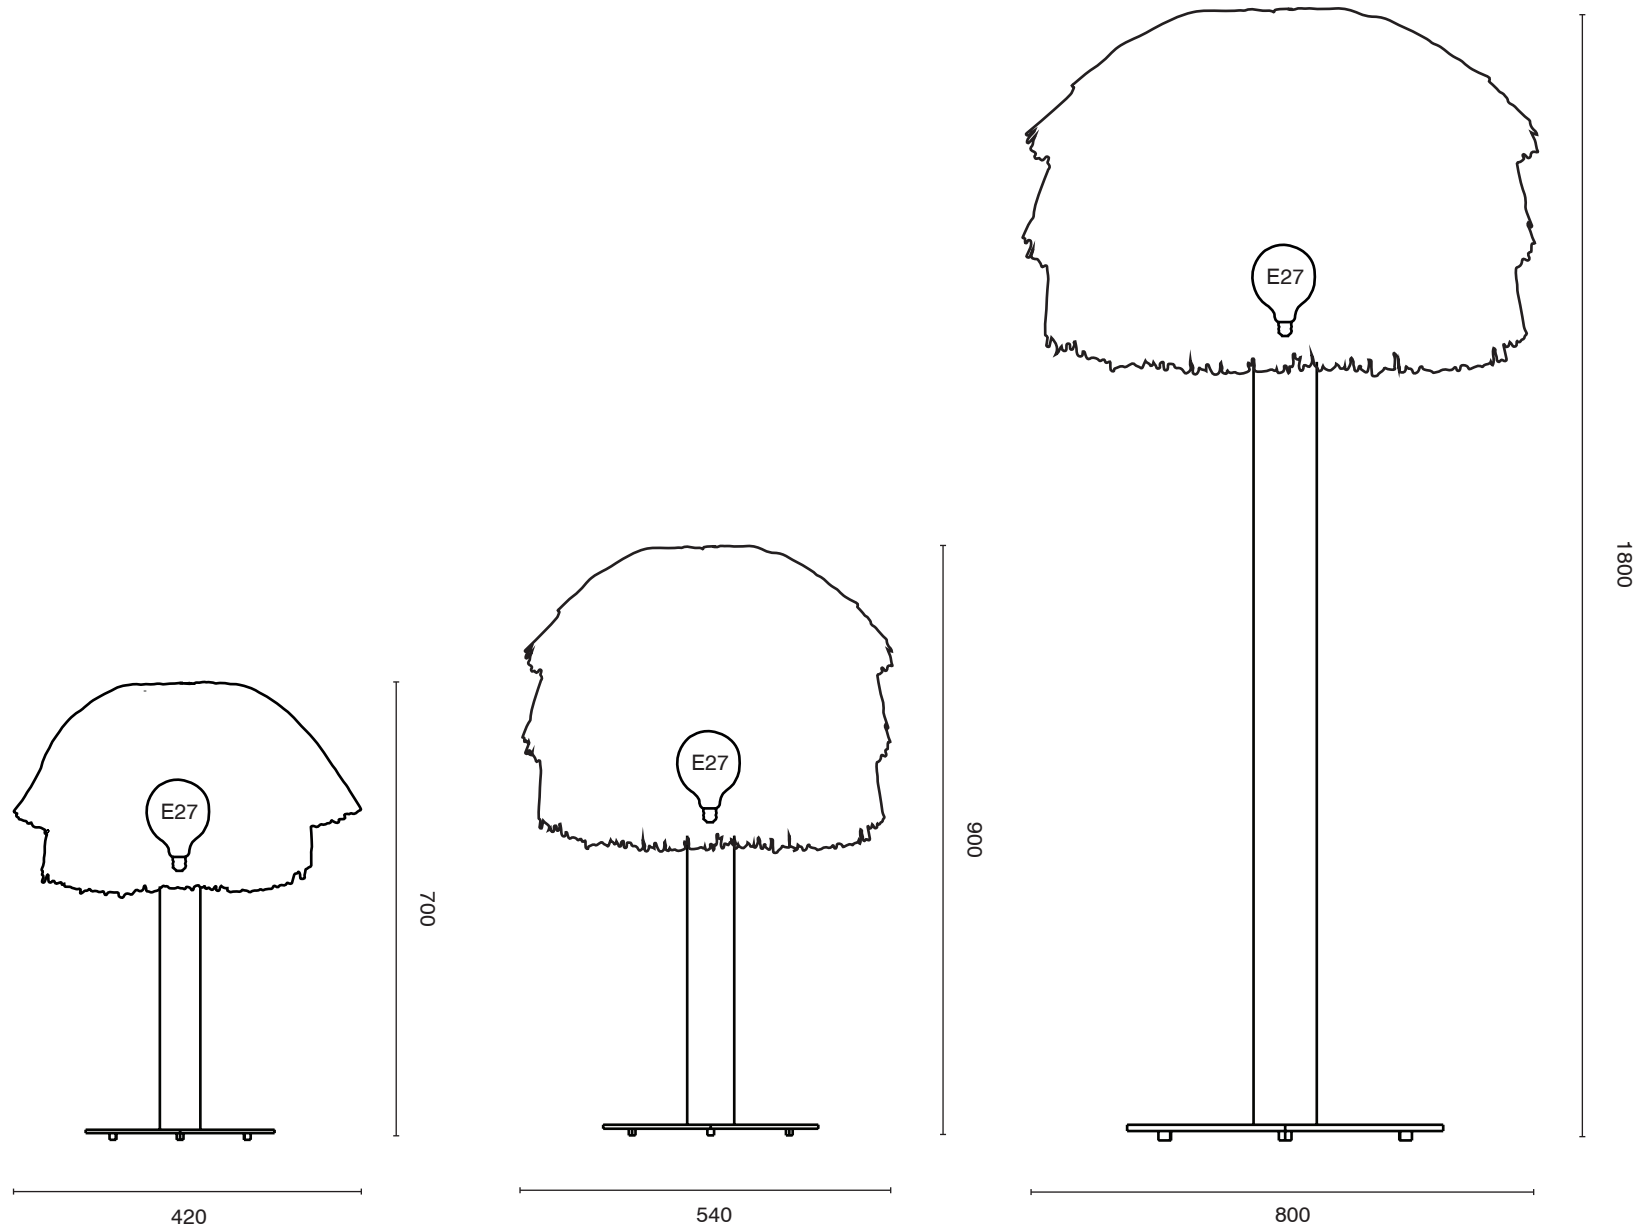

FRAN	
description:	pendant light
material:	raffia fringes
colours available :	coral, beige, green, black
including:	light bulb is not included
made in:	latvia
production:	100% hand made
availability:	in stock
