

FRAN

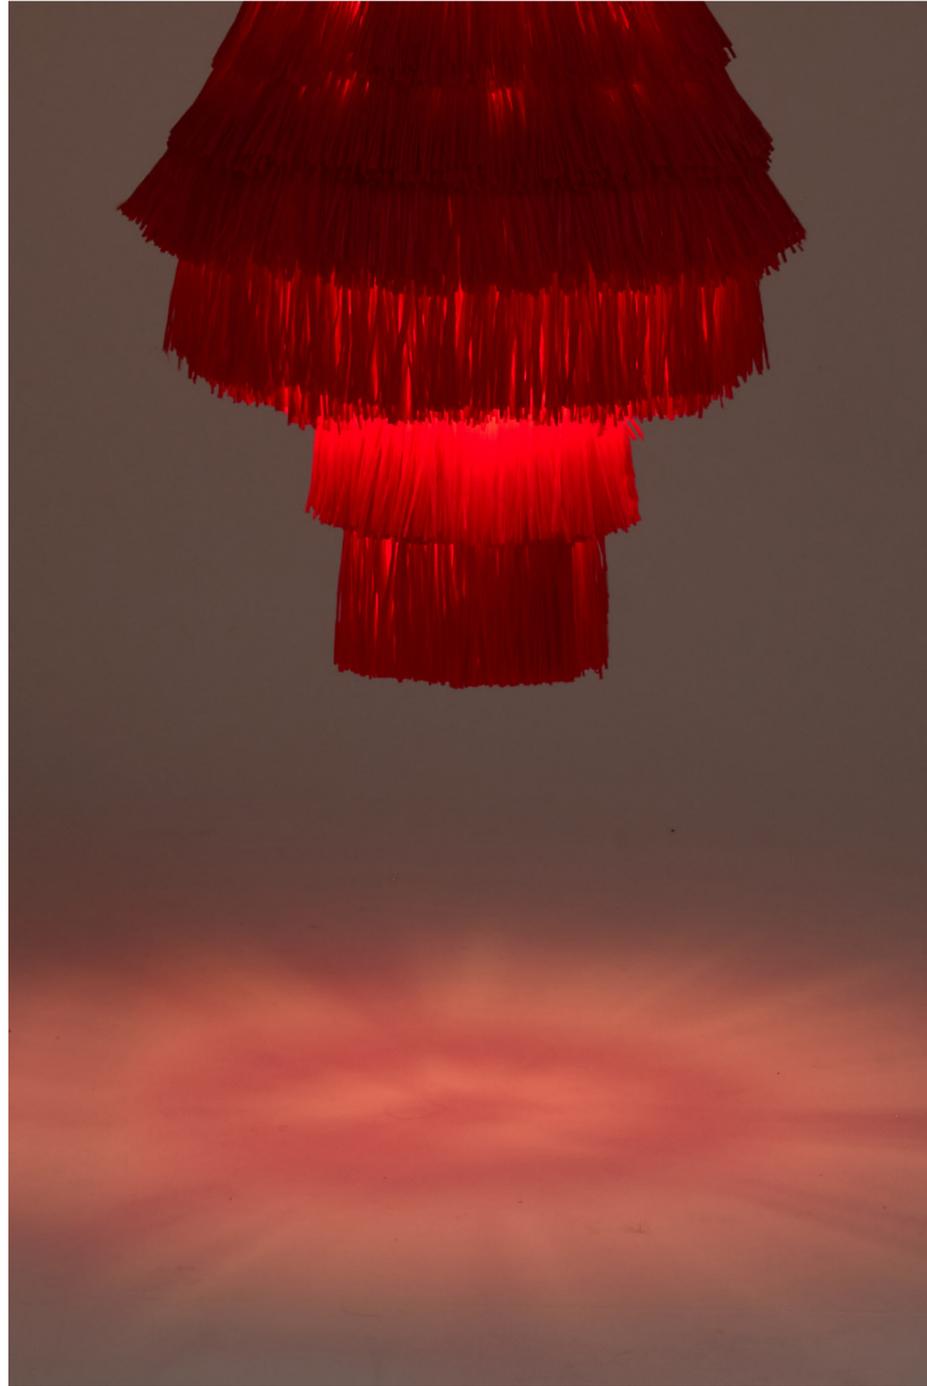

All FRAN lamps are handmade in Latvia. Our production partner Dobbins and Daughters works with mothers and housewives who are not able to work regularly and therefore take on the production at home and in their own time.

The fringes of the lamps from the FRAN family are made of rayon raffia, a sustainable and hard-wearing material also known as Japanese grass. The cellulose fiber is obtained from plants and is therefore biodegradable and recyclable.

For each lamp, the rayon raffia fringes are sewn together and then applied by hand to lamp rings. The individual rings are then connected with chain links. Finally, quality control is carried out by Dobbins and Daughters. The finishing of the luminaires is carried out in Germany by a licensed company.

The eye-catching and elaborately handcrafted light object consists of 15 rings sewn with fringes of rayon raffia, which are lined up in different widths. The FRAN TOWER, whose shape is reminiscent of a lampshade totem, is 1.9 meters high and 65 cm in diameter. In the middle of the shade, there is a dimmable customized LED fabrication to illuminate the object evenly.

Another member of the FRAN family is the floor lamp FRAN STAND. The pole that supports the FRANS lamp body is made of glass fiber and is plugged together according to the tent pole principle. It is thus flexible so that the lamp begins to swing in the wind or when touched. The base that holds the lamp is made of powder-coated steel. For the necessary weight, but also for the individual style, the base consists of two compartments into which classic concrete floor plates are embedded for weighting. But any other stone slab in a suitable format can also be used for weighting and design. FRAN STAND is available in different sizes: S, M, L, and CS.

With their bulky silhouette and rustling fringes, the FRAN lights are reminiscent of a piñata. While their cable becomes the suspension string, their fluttering body is made of high-quality rayon, a viscose fiber based on cellulose. The fringe strands are fitted in layers and create a subtle bob or a bulky statement piece – depending on the amount of material. FRAN is available in four bold block colours (beige, red, green, and black), which work on their own as in monochrome or contrasting combinations as well.

The FRAN EDITION is an extension of the pendant lamp collection, available in three additional sizes and shapes. The EDITION is even more demanding in its production than other lights of the FRAN family, as more fringes are sewn by hand on different shapes. The different and voluminous objects are reminiscent of matryoshka, Asian lanterns or traditional African masks.
